Cover Letter

To whom it may concern

Thank you kindly, for taking the time to read through my resume and cover letter.

I am a professional special full stack developer who has various skills and experienced to development for the Back-end server API and the Front-end UI,UX for making international business webs and smartphone applications on NodeJS and React and ReactNative

My advantages are very wide ICT skills and experties which are Front-end, Server Side, Back-end Data Base, Network, Security via globally worked experience on over 5 years where in Korea, Mexico, Australia. and my additional advantage is proven professional international ICT certificates

Maybe you would be not need to hire many ICT guys who are the back-end developers , the front-end developers, the publisher, the IOS developers and the Android developers, because I am a special full-stack developer who can make business program web and smartphone app on NodeJS and React and ReactNative by my alone such as like free lancer and also I have been experience while 5 years to 10 years about developing ICT programs, and in the future , I would like to development AR, VR, MR or artificial intelligence(A.I) programs by new technologies

For working in international company, I have experienced to visited ICT companies of the USA which are Google, Facebook, Apple, Adobe, where in San Francisco, and I had traveled to lot of Europe countries where to England, Netherlands, Belgium, Luxembourg, Germany, Italy, Swiss, Monaco, France, Mexico, USA , Canada and I lived in Australia while almost 2 years

My hobbies and interests are willing to learn new technologies, I am interested regard to the artificial intelligence(A.I) and AR, VR, MR apps. I believing that would be blue ocean markets in our future, and it would be changes our life cultures such as like Youtube and Uber, AirBnB

If you give me opportunity to fabulous work in bright future with your company then I would like to work by diligent and faithful on willing mind for your company and I would be very grateful to your company

Thank you for your time

Sincerely

Developer. Sky Hanel Kim
